

**Program:- Create Hello World Function**

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Function</title>
  <script>
    function createHelloWorld () { //function created
      var a = "Hello Wold"    //storing string to the a variable
      return a;              //returning a variable
    }
    var b= createHelloWorld(); //calling function
    document.write(b);        //display the result
  </script>
</head>
<body>

</body>
</html>
```

**Program :- Allow one function call**

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Function</title>
  <script>
    var once = function() { //creating function
      if(once.done) return;  //checking condition
```

```
    document.write('Allow once function call'); //display the result
    once.done = true;
};
once(); //calling function 1
once(); //calling function 2
</script>
</head>
<body>

</body>
</html>
```
